

NEESHAN ISMATH

Software Engineer

I am an Information Technology graduate with experience including Frontend development, Backend Development, and Quality Assurance. I have hands-on experience in designing responsive user interfaces, developing scalable web applications and APIs, managing databases, and ensuring software quality through testing and debugging. My technical skills include React.js, Node.js, Express.js, Django REST Framework, Spring Boot, MySQL, PostgreSQL, Git, and modern web development technologies.

Education

University of Moratuwa

BSc (Hons) in Information Technology (2022-2026)

Zahira College Mawanella

G.C.E Advanced Level - **A, 2B**

G.C.E Ordinary Level - **7A, B, C**

Experience

DotTech (Pvt) Ltd — Software Engineering Intern

Online | 6 months (2025 March)

i Developed and maintained backend services using Node.js, contributing to RESTful API design and server-side logic.

Neat Designs Australia — SEO Intern

Online | 3 months (2024 September)

i Gained hands-on experience in keyword research, on-page optimization, content optimization, and improving search engine visibility.

Tech Me Today United Kingdom — SE and QA

Online | 2026 August - Present

i Contributing to software development, testing, and quality assurance.

Projects

Natural Language based data visualization tool

i (Level 2 Software development project)

I led the development of a web app that connects external databases, converting natural language queries into SQL to generate data visualizations in customizable charts and tables for intuitive analysis.

Tools and Tech: React , LLM , SQLite , Django RF, Cypress

Link: [Github](#)

Role: Full Stack Developer , Team Leader

Grade - A

Automated Test suite with For API and UI testing

i Developed a Behaviour driven automated test suite for a web application with reporting, UI and API test automation, with 100+ test cases, with 80+% test coverage

Tools: Playwright, Cucumber, Allure reports

Technical Skills

PROGRAMMING LANGUAGES

- C
- JAVA
- Python
- javascript

WEB DEVELOPMENT

- HTML/CSS/JS
- Django RF
- Springboot
- JQuery
- Node.js
- Express.js
- React.js

DATABASE

- MySQL
- MSSQL
- SQLite
- MongoDB
- SSMS
- PostgreSQL

VERSION CONTROLLING

- Git
- Github

MOBILE APPLICATION

- React-Native

OTHER

- Figma
- Blender
- Canva
- LLM (Ollama, OpenAI)
- Sketchup
- Three.js

Non Technical Skills

- Time Management
- Problem Solving
- Presentation skills
- Flexibility
- Leadership
- Communication
- Team work
- Creativity

Competitions

- [Code Gladiators 2024](#)
- [HackMoral 6.0 - INTECS \(2024\)](#)
- Innovate with Ballerina-WSO2 (2024)

Certifications

Web design for beginners

Open Learning Platform-UoM

C programming

Udemy

Css3

Hackerrank

Front end web development -

React js

Devtown

Developer students club

Volunteering and clubs

- UOM FIT Company Coordinator panel of Level 2 Projects
- Mora Esports - Member
- OC – Finance Team, Dev{thon} 1.0 – UoM Leos

Recreational Activities

Gaming | PC Building | Coding
Badminton | Travelling

Referees

Mr. Mohamed Muzammil Azeem

Bachelor of Engineering - BE,

Computer Science,

University of Moratuwa.

Senior Software Engineer,

WSO2.

mail id: azeem@wso2.com

Dr. Supunmali Ahangama

PhD (NUS), BSc (Hons) IT (Moratuwa)

Senior Lecturer,

Faculty of Information Technology,

University of Moratuwa

President - SLAAS Section E3 (Computer Science)

Treasurer - IEEE Computer Society SL

Chapter

Portfolio Website

-  Personal portfolio website using React, showcasing skills, projects, and expertise in a dynamic and responsive design.

Technology: React

Link: [Portfolio](#)

Sports Mobile Application

-  A mobile app developed with core features such as Firebase authentication for secure login and registration, a home page with public API integration for dynamic content, and a dashboard displaying the username and click counter. It uses Context API for state management and a third-party navigation library for seamless transitions.

Technology: React-Native

Link: [Github](#)

E-commerce Microservices Application

-  Built using microservice architecture. The core services include User, Authentication, Product, Payment, Inventory, Order, and Cart services, each functioning independently and communicating via APIs. This app was developed as a project for Enterprise Application Development module

Technologies: Next JS, Java (springboot), mongoDB, Postgresql

Employee meal ordering App

-  An app designed for companies to streamline daily meal orders. Employees can place orders within a set time using a calendar. Admins can also track and manage meal expenses for better organization and efficiency.

Tools and technologies: React, Ballerina , MySQL

Device to Monitor and control theft in Motorcycles

-  I led the development of a microcontroller based device to detect motorbike theft, sending alerts via SMS and a buzzer, assisting with speed limit control and tracking the bike's location for enhanced security.

Technologies: Arduino, C, atmel studio, blender, kicad

Role: Team Leader

Research Projects

Research review Paper on Ethics in AGI

-  Researched and wrote a review paper on Ethics in Artificial General Intelligence (AGI)

Grade: A

Link: [Research PDF](#)

AI-Powered University Admission Prediction and Recommendation System for Sri Lankan GCE A/L ICT Applicants

-  (Final year research project)
Developed a hybrid AI-powered university admission prediction and recommendation system that uses machine learning and rule-based analysis to provide personalized ICT degree recommendations, admission probability estimates, and explainable guidance for Sri Lankan GCE A/L students.
